

# EXCALIBUR

## VISION

## Global security

Access control | Cctv | technical and security alarm | Supervision

From the simple office to  
the world wide company

From 2 to 32 000 doors  
From 16 to 1024 Cameras  
From 32 to 32000 Alarm points  
From 1 to 1 million cards  
From the lift management to  
the card design and printing

MULTI-TASKS  
MULTI-WORKSTATIONS  
MULTI-LOCATIONS  
MULTI-FORMATS  
MULTI-LANGUAGES

For high security projects

ExcaliburVision is a **COFADIS** solution

ExcaliburVision : Global Security Management

# Access Control

Virtually no limit

Multi technologies for credentials

IP Architecture

Suitable with up to 660 cards readers types

Management of cardholders, vehicles, devices

Modular panels

10 years warranty on panels

## EXCALIBUR

# Security alarm Technical alarm

Up to 32 000 alarm points (technical or security)

Up to 160 inputs by panel

Up to 32 000 partitions

Up to 32 000 timers

Up to 32 000 outputs

10 years warranty on panels

# CCTV

ONVIF

Video IP, HD-Sdi or analog

Up to 1024 cameras

Up to 60 FPS per camera

Broadcast streaming for tablets and advanced phones

Plates licence recognition

Smart display on events

Management of video events

Video analysis

**Luxriot**  inside

**VISION**

Fire

Pumps

Air conditioning

Generator sets

Lightning

## Super-vision

Up to 40 comm ports for external devices

Hot-swap servers

Up to 990 workstations

Dynamics maps

Voices messages

Management of instructions

**Access control** | Cctv | technical and security alarm | Supervision

## ACCESS CONTROL

### The basics points by ExcaliburVision :

- Rights management for people or groups
- History reports
- Automatic locking of doors and gates
- Real time monitoring of doors and gates
- Multi-location, multi-technologies
- Multi-workstations, multi-languages
- Graphic interface
- Open connectivity

ExcaliburVision can handle up to thousands locations with only one server. ExcaliburVision manages local or remote locations by Tcp/Ip, RS-485 bus or simples phones lines. The workstations are linked to the server by network. Backup or hot-swap features are of course available.

Any location can have its dedicated workstations. The workstations are linked to the server and manage their local system (access, alarms, video).

Any workstation can be filtered « feature by feature » or « point by point ».

Any ExcaliburVision location can handle hundreds of controllers or cards readers.

If, for security reasons, the RS-485 is used, the star cabling and the lengh of 1700 meters between panels allow projects in very large locations.

The downloads are fully automatic and never require an human action.

Any ExcaliburVision location can use dozens of reader type in the same time. In the same way any card holder can have dozens of credentials ( in any technology).

### Supported credential technologies :

- All proximity technologies : EM-125, Mifare, Desfire, Fips, max-secure, Rfid , Legic, I-Class...
- Active or passive long range technology
- Biometry
- Old credentials technologies : Magnetic, Barcodes, Dallas chip...
- Embedded technology in locks or cylinders

Up to 80 credentials technology

IP or RS-485  
or modem

Up to 1280 doors/gates by location

## High security features :

- 100% of security features managed by controllers
- Anti-passback, anti-time back
- « Who is in ? » report
- Double badging
- Advanced crisis management
- Emergency evacuation or temporary black-out
- Linking level

## Major cards readers manufacturers :

- HID, I-Class
- X-CeedID
- Indala
- Farpointe
- Stid
- Deister
- Wavetrend

Access control | **CCTV** | technical and security alarm | Supervision

## CCTV

### VIDEO

Record on alarms  
Mosaic display on events  
Dynamics maps display  
PTZ presets  
Push email

Motion sensor  
Stream break  
Alarm on camera  
VCA management  
Storage alert  
Alarm on Ip module  
Licence Plate numbers

### Access control Alarm

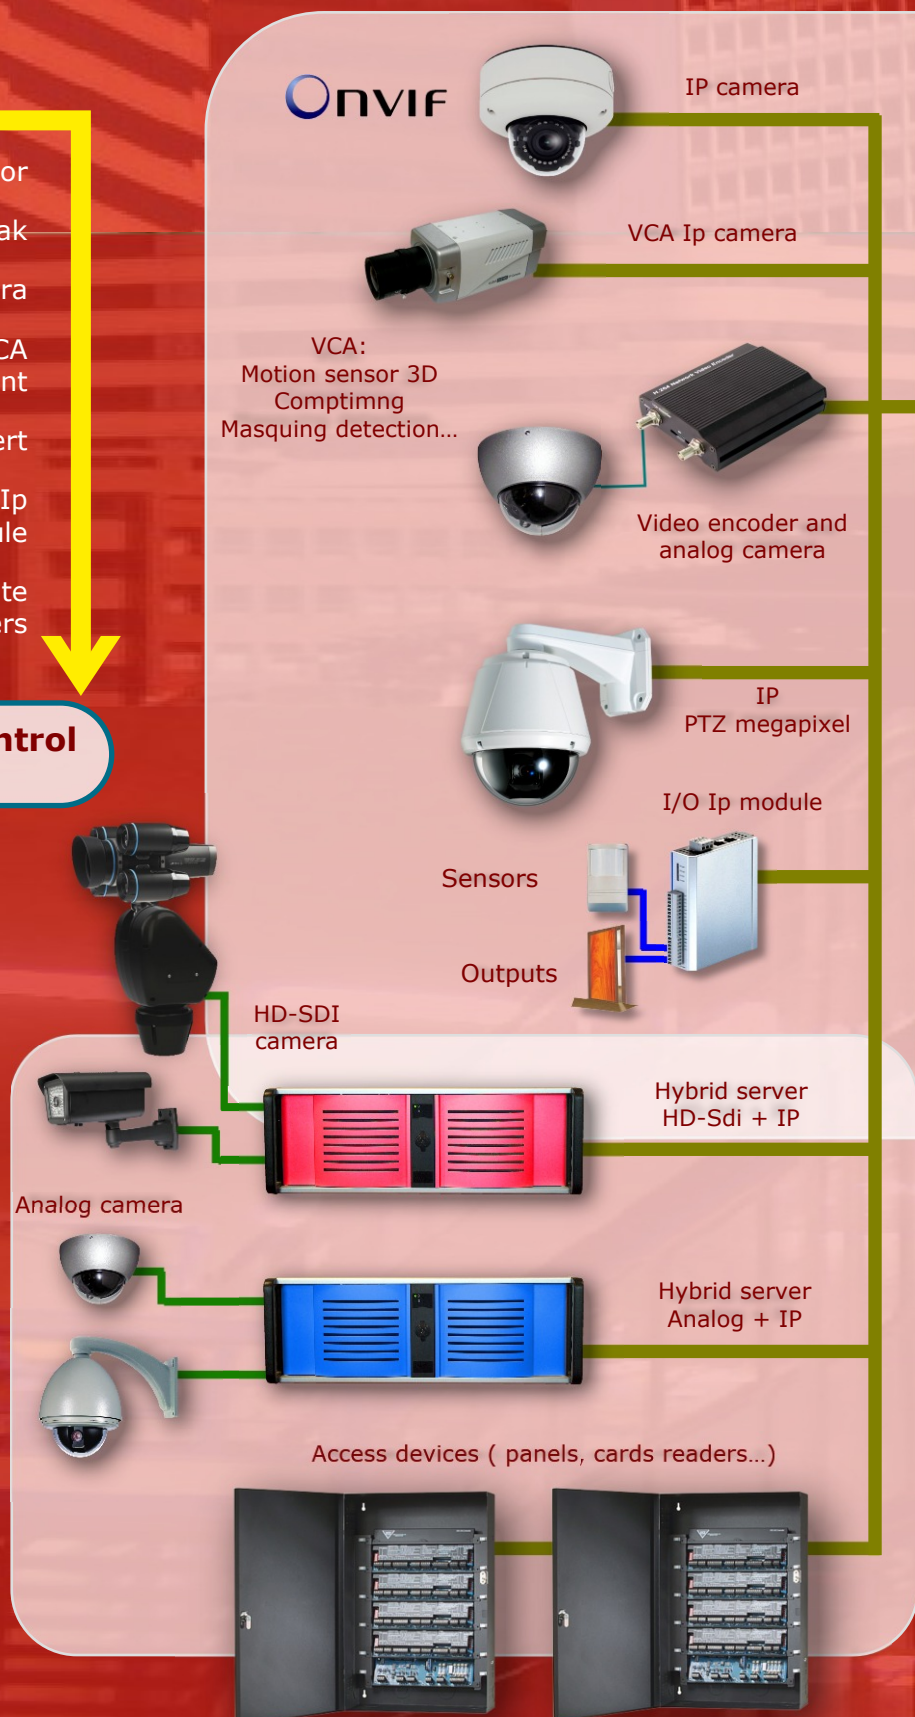

ExcaliburVision brings a great interaction between the CCTV, access control and technical/security alarms.

The CCTV architecture, like for access control and detection, allows to build large projects in high security multi-locations.

The NVR's can handle up to 1600 Ip-cameras from all the major world wide manufacturers.

Some NVR's are hybrids and allow to handle HD-Sdi or analog cameras.

The NVR's are embeddind **luxriot** technology.

## Design your video system without any constraint...

- IP cameras
- HD-Sdi cameras
- Analog cameras

### Some major cameras manufacturers :

- |           |            |           |                |
|-----------|------------|-----------|----------------|
| • Axis    | • Truen    | • Arecont | • HikVision    |
| • Acti    | • CBC      | • Sony    | • Pelco        |
| • Samsung | • Infinova | • Sanyo   | • Jvc          |
| • Mobotix | • Samsung  | • Stardot | • Panasonic... |

**TRUEN**  
**Panasonic**

**AXIS**

**SONY**

**Arecont Vision**

**computer**

**DYNSA**

**ACTi**  
Connecting Vision

Access control | CCTV | **technical and security alarm** | Supervision

## Technical and security alarm

ExcaliburVision can handle up to **32 000** alarm points

These points can be grouped in thousands partitions. These partitions can be in permanent or scheduled monitoring.

These alarms can be linked to thousands of outputs, cameras, **mosaic display** or action messages/setpoints.

Alarm comments are also a great tool for operators.

# Supervision

Hot swap server

ExcaliburVision server

Flood alert

Air conditioning

Power generator alert

Lighting management

Pumping station alert

Fire alert

Up to 990 workstations

ExcaliburVision allows to handle hundreds of external technical devices

The alerts can be received by Ip (Rs-232 is also available)

These alerts are managed like technical alarm points. They can be linked to thousands outputs, cameras, **mosaic display** or action messages/setpoints.

The operators comments are of course also available on these technical alerts.

**The supervision feature require a deep project validation.**

## CCTV key points

- **ONVIF** and PSIA support
- RTSP support
- Multicast support
- No client workstation licence
- Audio recording
- Digital Watermarking
- **Usb joystick PTZ (USB)**
- « Ready to use » NVR or software licence
- LPR (Option)
- VCA (option)
- **Web access by HTML-5 (Iphone, Androïd...)**
- Hybrid NVR's IP + analog 16 or 32 channels
- Hybrid NVR's IP + HD-Sdi

## Access control and alarm key points

- All in one software ( except CCTV, Supervision and hot-swap)
- No client licence for workstation
- Up to 32 000 locations
- **Up to 1280 cards readers per location**
- **Up to 2048 alarm points per location**
- 10 bus per location
- 1 IP adress per location or per controller
- 40 000 cards per location
- 32 000 time zones
- 32 000 alarm inputs, 32 000 outputs
- 99 user fields
- 32 000 operators with 32 000 password profiles
- 32 000 dynamics maps ( with CAD file support)
- 172 readers types
- 32 000 alarm messages ( audio messages available also)
- **990 workstations**
- Gards tours management
- « Who is in ?» report
- Backup/restore feature
- Graphic design and printing for cards
- Image recall
